

# EJ Therapy-Occupational Therapy

## CLASSROOM STRATEGIES & INTERVENTIONS FOR STUDENTS HAVING DIFFICULTY WITH: WRITING & CLASSROOM TOOL USE

| IF YOU SEE:                      | TRY THIS:  |
|----------------------------------|--|
| LETTER REVERSALS                 | <ul style="list-style-type: none"> <li>●Teaching letters in groups. EXAMPLE: c,d,g,o,q are the "magic 'c' " letters to teach together; t,l,f,h,b are the "firepole" letters to teach together</li> <li>●Provide an alphabet strip on the desk</li> <li>●use different colors to visualize differences in strokes</li> <li>●for right-handers with number reversals, use left hand as anchor on paper to show how numbers like 3 and 5 go around index and/or middle finger</li> </ul>  |
| POOR LETTER FORMATION            | <ul style="list-style-type: none"> <li>●use adapted paper (raised line, only dotted middle and baseline, drop spaced) or graph paper underlays</li> <li>●use Handwriting Without Tears materials/strategies with verbal cues for letter formation</li> <li>●tape letter formation models to desktop</li> <li>●practice accurate multisensory formation: in the air with a "magic wand"; with finger against a ziplock bag filled with colored glue or hair gel; with playdoh snakes; with Wikki stix; with foil rolls; on chalkboard; on magna-doodle; on dry erase board, in cookie sheet covered with thin layer of sand</li> <li>●trace over letters using chalk or other sensory tool or with rainbow writing</li> </ul> |
| POOR SPACING                     | <ul style="list-style-type: none"> <li>●use graph paper--one letter or space per box</li> <li>●use popsicle stick spacers/spaceman (can decorate)</li> <li>●use non-writing hand index finger as spacer</li> <li>●highlight spaces in between words of text student is copying</li> <li>●highlight margins to increase visual impact of where writing begins and ends</li> </ul>   |
| ERASES OFTEN OR PRESSES TOO HARD | <ul style="list-style-type: none"> <li>●try variety of pens, mechanical pencils, fine point pens with no erasers</li> <li>●encourage structured error repair (EXAMPLE: do not fix mistake until entire sentence is complete)</li> <li>●put something soft or textured under paper, like thin sheet of styrofoam, sandpaper, padded notebook, carpet square</li> <li>●allow for spelling errors</li> </ul>  |
|                                  | <ul style="list-style-type: none"> <li>●put sandpaper under writing paper</li> </ul>   |

|  |  |
|--|--|
| OFTEN DOES NOT PRESS HARD ENOUGH                             | <ul style="list-style-type: none"> <li>●have student write with a squiggle pen</li> <li>●have student write with markers</li> <li>●try a #1 pencil (has softer lead)</li> </ul>  |
| AWKWARD GRASP ON WRITING UTENSIL                             | <ul style="list-style-type: none"> <li>●try a very short pencil</li> <li>●try a variety of pencil grips, pencil girths, and grasp styles</li> <li>●write on slantboard</li> <li>●use rubberband on wrist and hook on end of pencil to pull down into webspace</li> </ul>   |
| SLOW, LABORED, OR MESSY WRITING                              | <ul style="list-style-type: none"> <li>●increase time allowed for completion of work</li> <li>●reduce amount of work-while requiring improved legibility</li> <li>●space work sessions with short breaks</li> <li>●set time limits for specific writing tasks</li> <li>●set mutually agreed upon expectations for neatness</li> <li>●accept key word responses vs. complete sentences</li> <li>●reduce amount of copying from board; provide written version of board content</li> <li>●allow student to type or give answers orally</li> <li>●use appropriate height chair and desk; if chair is too high, place prop under feet</li> <li>● voice to text on goggle chrome or iPad to allow student to get ideas down.</li> </ul> |
| CHOPPY, MESSY SCISSOR USE                                    | <ul style="list-style-type: none"> <li>●remind student to hold scissors in "thumb-up" position all the time--the scissors do not change direction, the paper being turned by the non-cutting hand is what turns</li> <li>●encourage student to cut as slowly as possible (can put rubberband around scissors to provide greater resistance.</li> <li>●pretend scissors are alligators and they only like to "eat" the line</li> <li>● create lead-in lines to help students know where to start cutting</li> </ul>   |
| COLORING OUTSIDE THE LINES AND/OR NOT COLORING IN COMPLETELY | <ul style="list-style-type: none"> <li>●make the outline thicker and/or darker</li> <li>●encourage child to use finger vs. arm movements to move the crayon</li> <li>●encourage child to "make all the white disappear"</li> <li>●encourage child to watch crayon as it moves</li> </ul>   |
| DIFFICULTY WITH ORGANIZATION/LEGIBILITY OF MATH PROBLEMS     | <ul style="list-style-type: none"> <li>●use grasp paper or lines paper turned sideways to help students line up math problems</li> <li>●use highlighted to line up columns</li> <li>●provide number models on desk if student has difficulty correctly forming numbers</li> </ul>  |
| POOR ORIENTATION TO THE LINE                                 | <ul style="list-style-type: none"> <li>●Highlight or darken the baseline</li> <li>●use Wikki sticks or dried glue to provide tactile cue for the baseline</li> <li>●have students identify tall/short letters or provide a alphabet strip with letters the same color that should be the same size</li> </ul>  |
